

Social Assignments

Social and collaborative assignments and activities in your courses

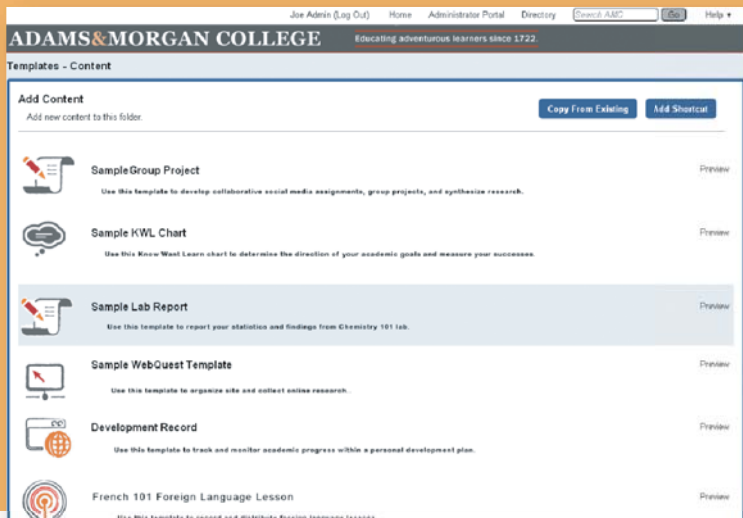

campuspack™

Challenge

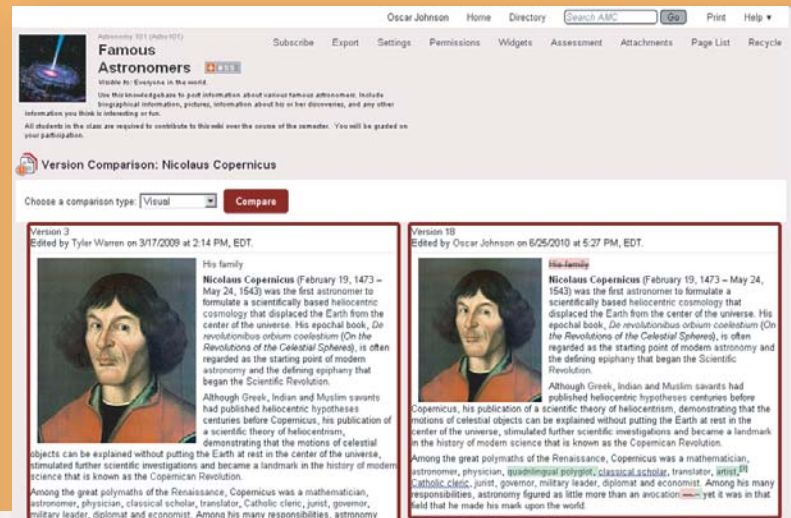

Implement a secure, integrated social media solution, including wikis, blogs, journals, podcasts, and templates which allow instructors and students to deploy social media/Web 2.0 assignments and activities within courses.

Solution

The Learning Objects Social Assignments will empower instructors, academic technologists, and instructional designers to easily build and implement social media assignments and activities from a library of re-usable tools including wikis, blogs, journals, podcasts, and templates.

Create and access social media templates in an online repository.

Side-by-side comparison allows an instructor to view the collaborative process during the assignment.
